

Comments on Docket 07-57, XM Sirius Merger

I am in favor of the proposed merger because it will result in a better deal for the consumer. Having access to all sports and the very best of both services will enhance my listening experience.

I am not surprised that terrestrial radio has "greased" every politician with an open hand providing them with scripted, negative comments about the merger. I am surprised that you, the FCC, succumbed to the same pressure to delay the decision and impose terrestrial radio sponsored, onerous conditions on the merger to neutralize satellite radio as a serious competitor.

For once in your public service careers, do the right thing and support the best interests of the public, not paid, lobbied corporate greed. Approve the merger without further delay, without crippling conditions and without eroding First Amendment rights.
